POINT	EASTING	NORTHING
DA1	282631.1E	5776979.0N
DA2	283339.7E	5776851.4N
DA3	283316.6E	5776723.4N
DA4	282608.0E	5776851.1N

**NOTES**

1. Contours indicate the approximate surface level of the basalt, as determined from bore logs contained in geotechnical reports by GHD (1993) and URS (2014).
2. Areas designated thus represent the extent of sediment and rock removal during the Channel Improvement Program in 1996-7 to achieve the current maintained depth in the channel of 12.3m CD. In the absence of significant siltation or pollution events that could have resulted in surface contamination since then, the material to be removed from these areas during the trial will consist of rock (basalt) or weathered rock.
3. Trench locations and dimensions indicated are provisional, and may vary during the course of the trial in response to results of the trial. All dredging however will be contained within the limits of the designated trial dredge area.

**LEGEND**

- Proposed Toeline-Shipping Channels
- Basalt Removed during 1997 Dredging Campaign
- Proposed 100m Trenches
- Existing Toeline Shipping Channel
- Cross Section
- URS Boreholes 2014
- GHD Boreholes 1992
- URS Sediment Sampling Sites (WSC2)
